The Scrip issued by this Company, for accumulated, or reserved profits, can in no sense be a present or even a prospective liability, except in the following contingency, which is the terms of its issue, viz.: "Whenever the said Scrip Fund shall exceed Five Hundred Thousand Dollars, the Board of Directors shall thereafter apply the excess thereof, annually, towards the redemption of the Scrip, commencing with that earliest issued." The Scrip Fund, standing on that condition, is a clear, unfettered, inalienable, indemnity to the Policies, — as much so as the Capital. The sensible and frank avowal of the Great National Board of Underwriters, and also of the Boards of this and other Cities, that our Policies on the "Participation Plan," are Better Insurance, worth ten and twenty per cent more than the Policies of the Non-Participating Companies, (being "iron-clad," as it were, by the large Scrip Fund), has had the beneficial effect to largely increase the business and prosperity of the Company — thereby extending its usefulness, and advancing the interest and security of its Policy Holders. *President*, Asher Taylor; *Secretary*, Henry P. [Chosen by concurrent vote.]

[He has also the care of all the Public Bells and Clocks.]

*Operators*, Charles A. Stearns, Jas. N. George, Cyrus A. George, J. Horace Stevens, Granville S. Mendell. *Repairers*, George S. Thom, Adam McAfee, Uzziel Putnam. Salary, \$4 per day. *General Assistant*, Chas. M. Chaplin. \$2 per day.

A constant watch is kept at the office, City Hall, night and day, by the operators. Each operator serves two alternate terms, of three hours each, as principal, and the same as assistant operator; so that twelve hours' service at the office, out of every twenty-four, is required from each operator. No operator is permitted to sleep during his watch, unless expressly relieved by some one else, and by consent of the Superintendent.

Each operator is accountable to the Superintendent for any mistakes that may occur at the office during his hours of duty.

An accurate account is kept of the time of giving each alarm, and of the station from which it originates, and all other necessary information.

Alarms are transmitted to the Central Office, from the Signal Stations or Boxes, by turning a crank in the Box. The police officers, and one other person resident near each station, have keys to the Boxes.

The ringing of the bells and the tapping of the Boxes, each denotes the number of the Station from which the alarm originated: thus, —one blow, a pause, three blows, another pause, and two blows (1—3—2) indicates that the alarm came from Box No. 132.

Alarms are usually given in less than a minute from the time the crank is turned in any Box.

The above cut represents a first-class Lathe, with Nason's Patent Screw-chasing Apparatus attached.

N. B. — **The American Tool and Machine Co.** are the **ONLY** authorized manufacturers and venders in the United States of the above patented apparatus.

The Lathe is particularly calculated for the manufacture of Steam and Gas Fittings. It is arranged to be used for turning, boring straight or taper holes, boring cocks, facing plain surfaces, and screw-chasing.

This section of Shaft, Coupling, and Hanger, here represented, requires no explanation; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box which adjusts itself to the shaft; and we guarantee it to run **SIX MONTHS WITHOUT RE-OILING**, thereby saving labor, friction, oil, and the disagreeable, and sometimes destructive, effects of the dripping of oil from above.

## OF NEW YORK.

[CHARTERED 1860.]

CASH ASSETS EXCEED \$1,250,000.

*Dividends declared and paid Annually in Cash. All Policies Non-forfeitable after Payment of Second Annual Premium.*

The entire Profits are equitably divided among the Policy-holders, annually. DIVIDENDS ARE NEVER FORFEITED, a feature peculiar to this Company, but may be paid to the Policy-holder in Cash, or applied to increase the amount insured, from and after the Second Annual Payment, at the option of the holder.

It is the ONLY COMPANY which APPLIES ITS DIVIDENDS TO HOLD GOOD A POLICY which otherwise would be null and void from non-payment of Premium. If a Policy, which has a Dividend credited upon it, lapses from non-payment of Premium, the Company will hold the Policy good for such a proportion of a year (or years) as the Dividend bears to the annual Premium. For instance, a man paying a Premium of \$365 annually on a Life-Policy of \$10,000, and having Dividends \$288 standing to his credit, would be held insured for \$10,000 for 288 days (9 months 18 days) after failing to pay his Premium! In some cases, the accumulated Dividends would keep a Policy in force SEVERAL YEARS!

### TRUSSES.

A large assortment of best patterns from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person two inches below the top of the hip-bone. If the rupture is at the navel, the measure should be around the body at the navel.

*Taylor's Patent Self-supporting Drawer.*

So arranged as to be drawn out to its fullest extent, and to support itself in that position, it being impossible for it to fall; and yet capable of being removed from the case and replaced with the same facility as a common drawer. There is none of that disagreeable side-motion and sticking of the drawer, nor is it necessary to exert one's utmost strength to pull it out or put it in. It is peculiarly adapted for tellers' drawers, money-drawers, &c.

Its advantages are perceptible at a glance; and the necessity of such an improvement warrants for its success. It has already been introduced into many public buildings and private houses, and has everywhere given complete satisfaction. Persons desirous of seeing specimens of work are invited to call at his manufactory, No. 1908 Washington Street. TAYLOR'S PATENT CRIB and CRADLE constantly on hand, and for sale. OFFICE OF ATLANTIC WORKS.

We know by experience, and take pleasure in testifying, that we have found it in every instance fully equal to your claim, "that it is the best pump now in use."

We believe yours to be the only one yet constructed which will pump lard at all times and seasons of the year satisfactorily.

**NORTH, MERIAM, & CO.**

**BOSTON, May 11, 1868.**

**MESSRS. GEO. F. BLAKE & CO.:—**

Gents, — In reply to yours of the 9th inst., we would say, the pump you built for pumping *thick beer mash* works to our entire satisfaction; it throws a full stream of thick mash or clear liquor, even when at boiling point. It is all right in every particular.

We have used other styles of pumps, but yours is the only one that will pump hot beer mash and keep the valves free.

The internal arrangement of the parts is so simple that it is not liable to get out of order. As we have used it now four months, has had no repairs, and it works as well to-day as when first put up, we therefore recommend it as invaluable to brewers.

### PATENT ERASABLE TABLETS,

We have this year some Fourteen New and Beautiful Styles, comprising three new patterns of Scotch Plaids. Also, three sizes of Memorandum Books, bound in Morocco, with Gilt Edges and Rims.

We would also call the attention of the Trade to our New Memorandum Books, for Pocket Use, bound in Muslin, Stiff Covers, and containing ten pages, with days of the week printed. Of these we have six sizes.

Our Erasable Tablets meet with a ready sale, and no stock of Stationery or Fancy Goods is complete without them.

The durability of the Goods, and the facility with which pencil marks are erased, cannot but cause them to be received with increased favor from all.

Our School Tablets, comprising Leaf Tablets, Spelling Tablets, School and Folio Tablets, Payson's Arithmetical Tablets, are extensively used, and the demand constantly increasing.

The following is one of the many testimonials received:—

AMERICAN TABLET COMPANY. Gentlemen,— We have been using your Erasable Tablets for a greater portion of the past year, and like them so well that we would not be without them. To say nothing of their other advantages, we find them the most economical stationery we can use. Respectfully,

All owners of property, and all parties holding property in trust and receiving yearly incomes from rents, should secure themselves and those interested from the loss of said incomes, in case of fire, by insuring said rents.

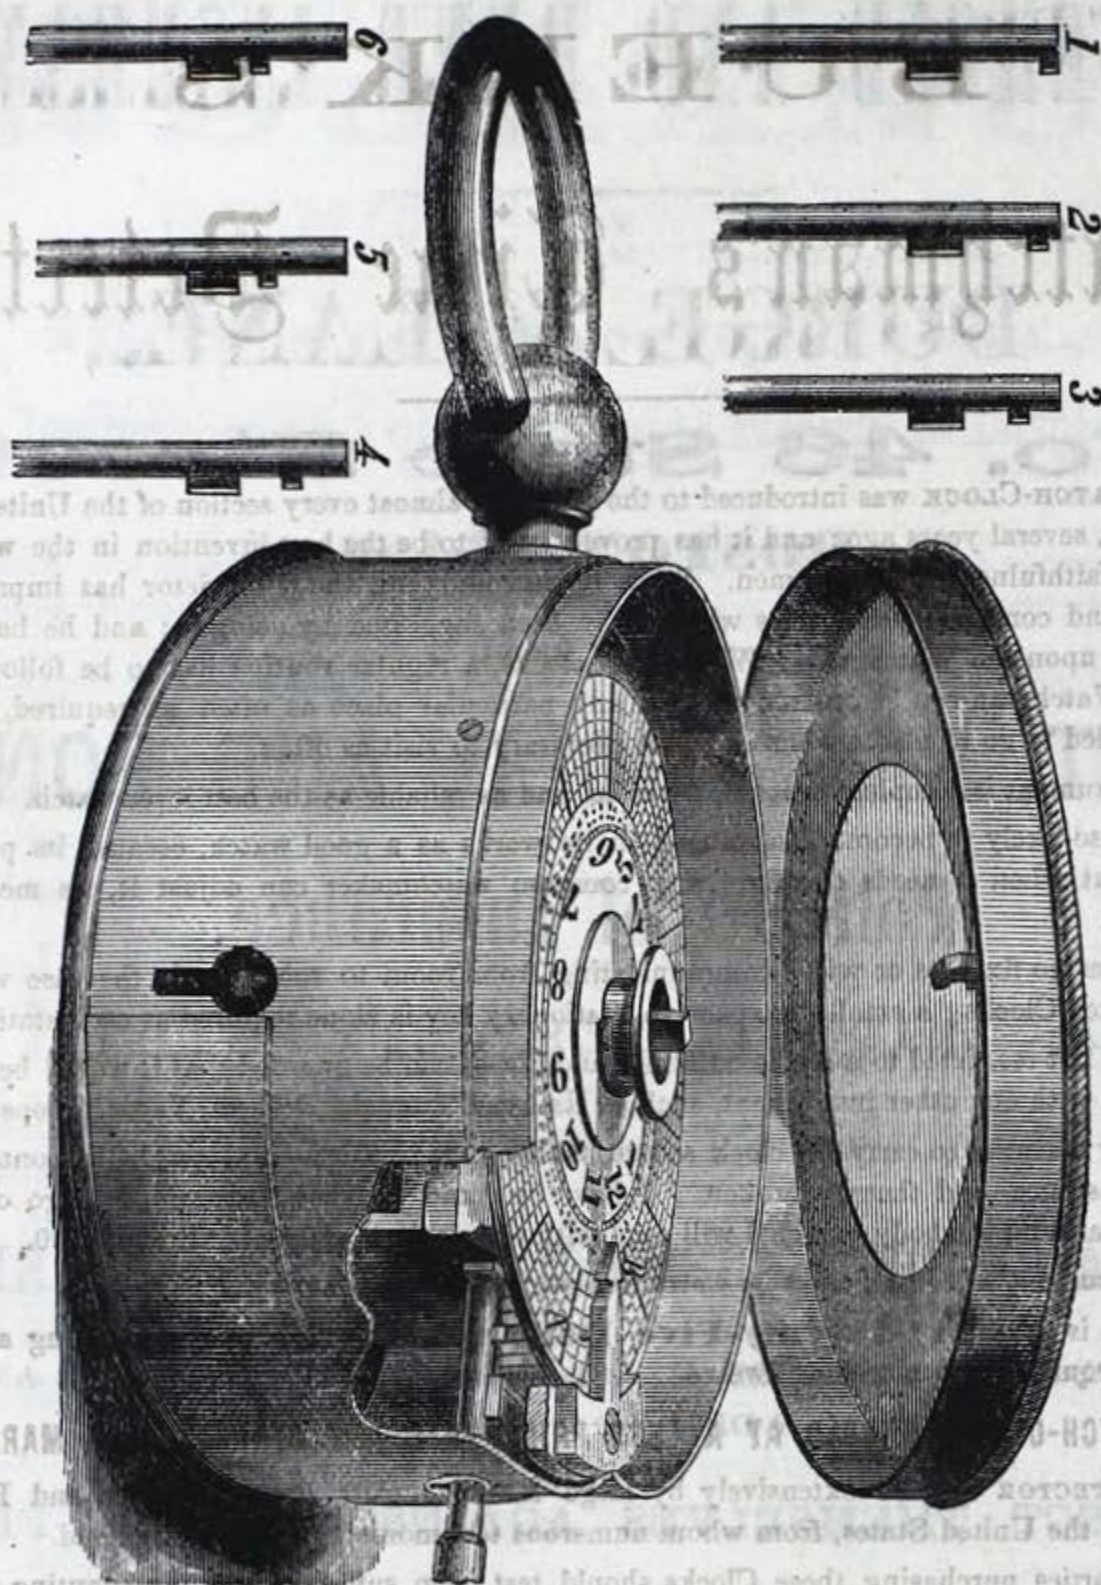

Lessees underletting property at an advance can cover their interest in said property, and indemnify themselves against loss in case of fire, by insurance.

**A BONUS PAID FOR A LEASE CAN BE INSURED.**

A Lessee, himself occupying premises leased, has, under some circumstances, an insurable interest, which can be covered by Policies of Insurance.

# Buerk's Watchman's Time Detector.

The above engraving is a view of a Time Detector, which is carried about by the watchman to all the different stations to be guarded. At each station is a small key, securely fastened to prevent his taking it with him. The watchman goes from station to station, takes the key fastened there, inserts it into the clock, gives it one turn, and goes on to the next, or to any other station, for he is not bound to go in regular order. By this it follows that a perfect record will be kept of each operation.

The broken-out portion of the watch shows the mechanism which operates the pin which pricks the paper. At A, there is a number of sliding bars which connect with the pricking points, so that, by turning round the key, the ward on it strikes a certain bar and penetrates the dial-paper B. By that act, a small hole is made in the paper, which tells what time the man appeared at each station; how often he came there; how long he stopped; how long it took him to go from one to another; whether he went in regular order or not; in short, it gives a complete record of his night's work.

# BUERK'S

## Watchman's Time Detector.

This WATCH-CLOCK was introduced to the public in almost every section of the United States and Canadas, several years ago; and it has proved itself to be the best invention in the world for testing the faithfulness of Watchmen. Since its introduction, the Proprietor has improved on some parts, and corrected deficiencies which have been suggested by using it; and he has now a perfect check upon the Watchman. With other clocks, a regular routine has to be followed, but with this a Watchman can be ordered to visit any particular place as often as required, without being compelled to go to places where it is not necessary to visit as often.

The instrument is complete in itself, portable, and as reliable as the best lever watch.

It is not so likely to become disarranged in its works as a good watch, because its parts are stronger. But when it needs cleaning, any common watchmaker can adjust it, its mechanism being simple.

It requires no fixtures or wires communicating from room to room, as is the case with the ordinary Watch-Clocks; a small, inexpensive, stationary key is alone required at each station.

Its use is not restricted to a single building, and places can be guarded that it would be impossible to guard with any other instrument, such as Railroad Tunnels, Bridges, Yards, Shops, &c.

It is very essential to carry the clock secure, taking care that it is not brought in contact with any hard substance, and thereby broken. I have on hand pouches with straps to go over the shoulder and around the body, which I will send with the clock, if ordered. Price, \$2.50.

The instrument will in all cases be warranted perfect and satisfactory.

Its price is invariably **Seventy-Five Dollars**, Cash on Delivery, including as many Keys as are requisite, not exceeding twelve.

**THIS WATCH-CLOCK IS SOLD AT A LESS PRICE THAN ANY OTHER IN THE MARKET.**

The DETECTOR is used extensively by large Manufacturing Establishments and Railroad Companies in the United States, from whom numerous testimonials have been received.

N.B. Parties purchasing these Clocks should test them sufficiently in the counting room or office, as they will not be taken back after having been injured by the Watchman through carelessness.

☞ This Detector is covered by two U. S. Patents. Parties using or selling these instruments without authority from me will be dealt with according to law.

## PATENT FANCY LOOM,

Adapted for weaving every kind of narrow fabric, such as

**Tapes, Ribbons, Webbing, Galloons,  
Bindings, Suspenders, with Woven  
Button Holes, Plain and Elastic,  
Rubber Goods, &c., &c.**

The inventor has devoted years of study and experience to improvements in machinery for the manufacture of the above-named, and many other kinds of narrow fabrics never before produced in this country; and, in addition, the company build Improved Machines for preparing and finishing the goods, consisting of Spoolers, Warpers, Quillers, Dressing, Calendering, Winding, Folding, and various machines used in the manufacture of Narrow-Ware Goods, all of which are secured by Letters Patent.

We also manufacture a superior Fancy Loom, for weaving all and any kind of Fancy Goods, either cotton or wool, heavy or light, with Knowles's Patent Drop Shuttle-Box. Every motion of this Loom is positive, and it cannot make a mispick, either on the harness motion or Drop Box, and can be run at great speed.

We also manufacture a new Patent Cam Loom, with or without Drop Box, from two to eight harness as desired, for weaving Satinet, Doeskins, Jeans, Flannels, plain or twilled, of wool, or Denims, Tick, Duck, or any kind of heavy cotton or linen goods.

The proprietors, in bringing this loom before the public, are confident that they need only to be seen in operation to convince any one that, as they are in their mechanism an entire departure from all the old paths, so they are greatly in advance of any looms now in use. They are simple, easy to be understood, and will weave with less damage or breaking of warp than any other loom.

The above Loom received a Gold Medal at the Fair of the Massachusetts Charitable Mechanics' Association in 1865, and at the fair of the Worcester County Mechanics' Association in 1866; and is acknowledged to possess decided advantages over any other loom yet invented.

Portable Engine, Locomotive Boiler. From 8 to 40 Horse Power.

## Marine, Stationary, Portable, Pile-Driving and Hoisting STEAM ENGINES.

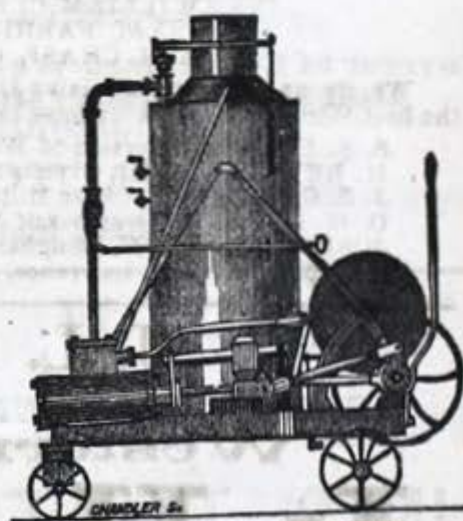

We would call the attention of the public to our IMPROVED PORTABLE STEAM ENGINE, in which all the working parts of the Engine are built on an iron frame (like a common Stationary Engine), thus avoiding the heat from the boiler to the working parts of the Engine, and the strain on the machinery caused by the expansion of the boiler; making both Engine and Boiler more durable than the usual style of Portable Engines.

These Engines are designed for all purposes where Stationary Engines could be used, and for loading and unloading vessels, Pile-Driving, small Steamboats, and Mining purposes.

They do not require any brick-work, and are ready for operation on delivery. The Boilers are warranted to carry 100 lbs. per inch.

Portable Engine, Upright Boiler. From 4 to 12 Horse Power.

Pile-Driving Engine.

We use a Patent Regulator-Valve movement on our Stationary Engines, which, for economy and perfect regulating, is not surpassed.

Having erected a new and commodious Shop, we are prepared to make **SHAFTING, PULLEYS, SAWMILL, MINING AND PUMPING MACHINERY**, and all kinds of **MILL-WORK**, with dispatch.

**READ THIS LETTER.**

BENJ. CHICKERING, Esq.,

EAST HARTLAND, CT., February, 1867.

*Secretary Berkshire Life Insurance Company:—*

DEAR SIR: I have this day received full payment of the Policy on the life of my husband, Charles M. Elsbree, who insured in the **Berkshire**, October 27, 1865, and paid one premium in quarterly payments. When the second premium fell due he was ill, and the premium was not paid, or received by the Company; on the third of November following he died. Receiving notice that under the non-forfeiture plan of the **Berkshire**, the Policy was still good, notwithstanding the second premium had not been paid, I made the required proofs of my husband's death, and forwarded the same to the Company at Pittsfield, Mass., on the 12th day of January, 1867. I have to-day received their draft for \$955, being the full amount of the Policy, after deducting the one premium due in October last, unpaid, with the interest on the same.

MRS. MARY J. ELSBREE.

This is a new and verified Theory for the Mechanical Formation of the Voice.

Its principles are simple and definite; and, when it is reduced to practice, it is certain in its results. It restores debilitated throats, and so forms the voice as to completely protect the organs from injury, and and prepare them for the discipline of Elocution.

Great Economy in the Cost of

## GENERATING STEAM

For Mechanical and Commercial Purposes.

Notice is hereby given, that the Company formed for receiving applications, furnishing and setting up the necessary apparatus for burning Liquid Fuel, under the Patents of HENRY R. FOOTE, in

Marine, Locomotive, Stationary, Portable, or Steam  
**FIRE-ENGINE BOILERS,**

is now ready to commence operations. The practical tests to determine the evaporative efficiency of oil as a steam fuel, when burned by the above apparatus, have proved equal to all that is claimed for it.

The following are the advantages realized by the new method :

1. No change of boiler, or furnace, or machinery, is required.
2. Simplicity,—no extra skill or labor in managing it.
3. Perfect Safety,—freeness from accident or fire.
4. Durability,—does not get out of order.
5. Economy,—does save from 25 to 37 per cent. of the present cost of generating Steam.

Application may be made by letter or otherwise, and full information obtained by addressing

PATENT

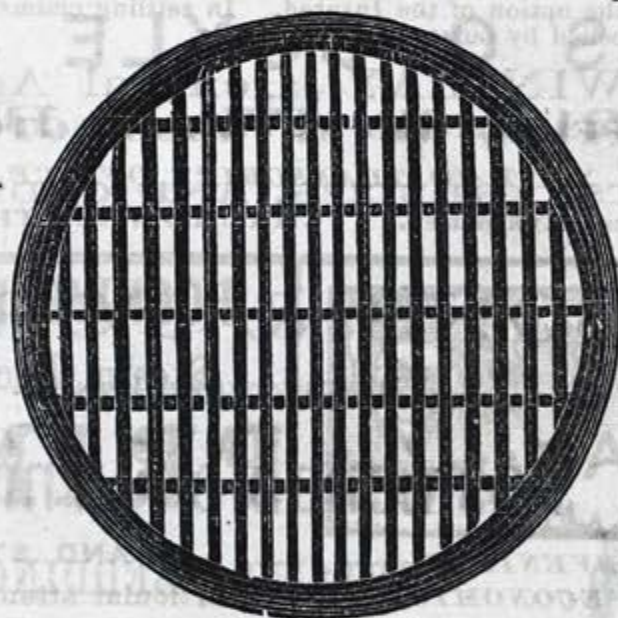

## FURNACE GRATE BAR,

FOR

Steamships, Steamboats, Locomotives, Stationary Furnaces, &c.

Top view of Two Bars.

PATENTED OCTOBER 2, 1866.

The advantages which these bars possess over others is in their combination, and the distribution of the metal in such a manner that there is no possibility of their warping or twisting about, as is generally the case with other bars; they are also much stronger and more durable, and, in consequence of their combined strength, can be made considerably lighter.

## OF HARTFORD, CONN.

President, E. A. BULKELEY. - - Secretary, T. O. ENDERS.

Assets, \$9,000,000. Annual Income, \$6,000,000.

The growth and progress of the ÆTNA LIFE INSURANCE COMPANY since 1862, when it adopted its Mutual Plan, with new features and improved methods of Insurance, has been such that its receipts now average more a week than they were for that entire year.

This popular appreciation, which, during this period, *increased its business fifty-two times*, is further shown by the fact, that *over \$15,000 additional persons secured policies* in it during the past year.

Its economy, sagacious management, care in selection of risks, as shown by its small expenditures and large receipts, enable it to pay a *dividend of fifty per cent*, and insure its members at the lowest possible cost.

Further particulars and explanations may be obtained at

# SOLAR GAS MACHINES,

FOR LIGHTING

PRIVATE DWELLINGS, CHURCHES, HOTELS, AND FACTORIES,

Of any size, in any Locality, at a cheaper rate than Coal Gas is afforded in the largest cities.

WE manufacture eight sizes of the SOLAR GAS MACHINE, ranging from ten to five hundred light capacity. Every machine is put in operation and fully tested before it is sent off, and is guaranteed to give perfect satisfaction. This new apparatus is the result of fifteen years of experience in this special line of manufacture, and we feel warranted in asserting that our machine excels all others of a similar kind in the market. It is much simpler and more efficient than any former manufacture, and is constructed with special reference to safety and durability. There is no possibility of an explosion under any circumstances whatever, nor is the gas tank likely to leak or give out, or any part of the machine to get out of order, if reasonable care is taken of it. From five to fifteen minutes daily attention is all that is required to keep any size of machine in perfect working order to supply all the burner jets in a dwelling or factory.

The SOLAR GAS is manufactured by the admixture of ATMOSPHERIC AIR with the VAPOR OF GASOLINE. The gasoline is contained in the tank A, and the air is supplied by an air-forcing pump located and operated within the cylindrical case B, C. The pump is revolved on shaft D by means of cord E, pulleys F, and weight G. The latter is arranged to wind up like a clock weight by applying the crank P to the projecting end of shaft or winding-drum D, the weight G acting as the propelling power to revolve the air pump, and thus force air in contact with the volatile gasoline fluid which is exposed to the action of the air by means of an absorbent vaporizer.

Gasoline is a volatile hydro-carbon fluid obtained from crude petroleum and bituminous coals, and is an article of regular manufacture by all coal-oil and petroleum distillers, and is furnished to the consumer at an average of forty cents per gallon, at that price it will furnish a ten candle light at six mills per hour. Five gallons is estimated equal to one thousand cubic feet coal gas.

A liberal Discount made to the Trade for Cash.

# HEBARD'S WINTER AND SUMMER BINNACLE OIL.

We claim this Oil as one of the most important discoveries of any age. It is harmless and safe as Sperm Oil as it is *perfectly unexplosive*, which at once renders it the most valuable and desirable production ever presented. It is without a rival as a

## BINNACLE AND TOP LIGHT

for vessels while at sea. It will not go out (if the lanterns are properly ventilated) during the most violent motion of the vessel in storms.

It will keep in any climate, improve with age, and remain perfectly limpid in the coldest latitude. It may be stowed anywhere on shipboard without danger to life, ship, or cargo. It is, therefore, of infinite value not only to ship owners, but to underwriters and crews. No ship should go to sea without it, as it is both safe and reliable in heat and cold.

Below we give a few of the many testimonials of those that are using it.

The above Oil, and tubes to go with it, may be had wholesale and retail, of

We have had a Roper Two Horse Engine in constant use for the past two years, heating our rooms and running nine presses, with sixty pounds coal per ten hours. Since having a Tripp's Improved Regulator attached it runs with a more even speed, and with less noise. We pronounce it unrivalled and faultless for the purpose to which it is applied.

For Sale by all Wholesale Hardware Dealers in this City.

The Engraving represents a valuable improvement by H. F. Jenks on the Foster Spring, well known for many years in the New-England States. It is very simple, comprising a *Steel Spring* secured to an *Iron Frame* by a *Screw*, by which the Spring can be adjusted to suit a light or heavy Sash. The *pressure* of the Spring against the jamb casing holds the Sash at any point, and prevents any rattling arising from *imperfectly fitting* Sash.

AGENCY OF THE  
**HICKS'S STEAM ENGINE,**

MANUFACTURED BY THE  
**SALEM MACHINE COMPANY.**

This Engine possesses many advantages over all other Engines now in use; surpassing them in economy,—namely, in first cost, in consumption of fuel, in lubrication, in attendance, in foundations, and space.

Being a double Engine, supplied with four pistons, receiving steam at four points in each revolution, it has no dead points; consequently, it requires no heavy balance-wheel to equalize its motion.

It dispenses with all external contrivances to convey steam to the pistons, as employed in other Engines. Each piston is so constructed that it is an induction and exhaust valve for the one beside it; thus saving all the friction of other Engines, except that of the piston itself.

Parties requiring Steam Engines will do well to give this a careful examination before purchasing.

We can refer to fifty Engines at work with the most satisfactory results.

# KNOWLES'S PATENT STEAM PUMP.

Patented in England and France.

This Pump has received the **HIGHEST PREMIUM** at every Fair where it has been exhibited; viz., New York, Boston, Baltimore, Cincinnati, Buffalo, Syracuse, Springfield, and Worcester.

It has no Cranks or Fly-wheel, and has no dead points where it will stop, consequently it is always ready to start without using a starting-bar, and does not require hand work to get it past the centre; and is the only Pump made that will work its steam-valve with water, consequently is always ready to start when the steam-cylinder is filled with cold water of condensation.

It has been used for more than eight years for feeding stationary **Steam Boilers**; and has been used more than five years on **LOCOMOTIVES**, and is the only Steam Pump yet tried that is in every way adapted for that use. It has been extensively used for pumping water for Hotels, Public Institutions,

Mining Purposes, and Manufacturing Establishments of every kind, with perfect success. It has been tested in the Navy; and in consequence is recommended by the Chief Engineer of U. S. Navy, to be used at the Navy Yards and on steamers. As a Fire Engine it is recommended by all Insurance Companies, and is universally adopted by the manufacturing companies in New England.

Although we have been constantly making additions to our Works, yet the rapidly increasing demand for our Pumps has hitherto been greater than our possible production; but, with recent enlargement of our Works, and extensive additions to our manufacturing facilities, we hope to be able to supply all orders.

The Proprietors offer this Pump as the **most perfect Independent Steam Pump** ever invented, and for **simplicity and durability** it defies competition, and is warranted in every particular.

For further information address the Proprietors at their Works.

500 to 2400 Pounds, always on Hand or in Progress.**

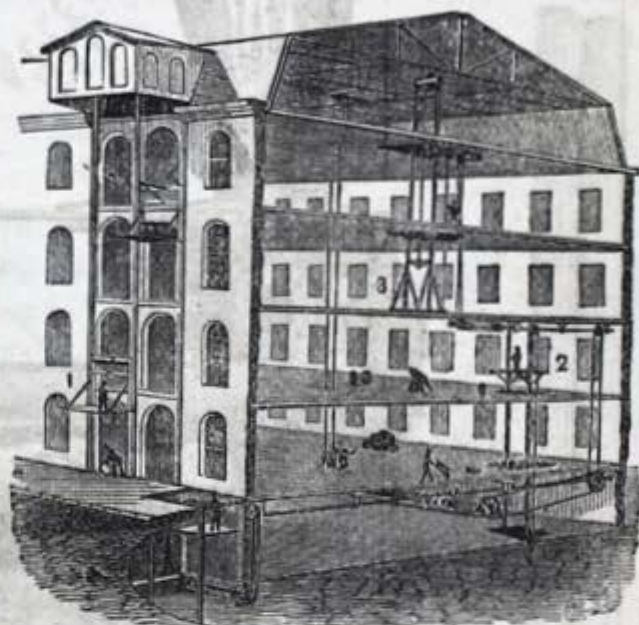

The best machines are arranged with Stop Motions, Pulleys on Independent Bearings, and self-oiling, and can be fastened to foundations, ceiling, wall, or attached to platform. The Platforms have safety catches, and are made to be open on two or four sides, as required.

The Starting Bar runs through all floors; have adjustable dogs to stop at any floor, making the machines under complete control of the operator.

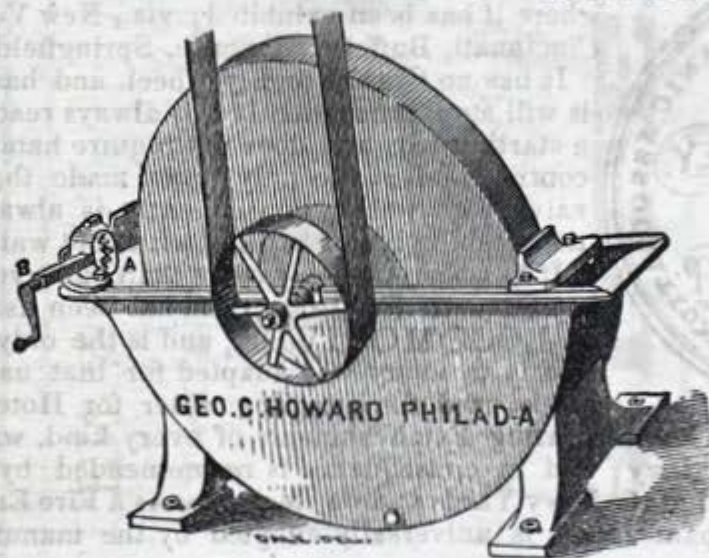

We erect Thompson & Morgan's Self-Closing Doors to openings, giving complete security against accident or fire.

If we have the size of opening, height of each story, kind of power used, speed of cage, and weight to be lifted, we can give the cost, erected complete, or we will furnish the machines and irons.

We have had fifteen years' experience in the manufacture and erection of this class of machinery. The number in use indicates a satisfactory machine. We also manufacture Machines for

# STEERE'S IMPROVED Self-Lubricating Spindle Bolster,

Patented January 21st, 1862, and November 8th, 1864.

**SAVES** from 50 to 75 per cent. in oil; requires oiling once or twice a week, and gives a free and steady motion to the spindles, by being uniformly oiled. They keep the frames and floors neat and clean, for the oil is not thrown off and wasted. Over three hundred and fifty thousand of them are now in use by over one hundred companies. All parties that use spinning machinery will find it greatly to their advantage to apply these Bolsters. They are made to fit all kinds of Spindles, by the following companies: at the Franklin Foundry Machine Co., Providence, R. I.; at the Lowell Machine Shop, Lowell, Mass.; at the Saco Water Power Machine Shop, Biddeford, Maine, and by several other companies.

A few of the many Certificates of parties using them are here given:

Westerly, July 20, 1863.  
E. N. Steere, Esq.: Dear Sir—This is to certify that we have been using your improved Self-Lubricating Bolsters, since May, 1861, and find them to be all they are recommended to be in every respect.  
BABCOCK & MORSE, Manuf. Westerly, R. I.  
A. GREEN, Supt. P. PECKHAM, Overseer.

East Hampton, Jan. 28, 1864.  
E. N. Steere, Esq.: Dear Sir—Your improved Self-Lubricating Spindle Bolster, that we have been using for the last two years, is giving entire satisfaction; where we were accustomed to oil twice a day, we now oil only twice a week; and the saving can fairly be estimated at seventy-five per cent. in oil, and time in oiling and cleaning frames; and in other respects they fully meet our expectations.  
Respectfully yours, SAMUEL WILLISTON.

North Scituate, Jan. 27, 1864.  
E. N. Steere, Esq.: Dear Sir—We have been using your Patent Bolsters in our frames and mules since October, 1861, and find that they do the service in every respect as recommended, and I think I can safely recommend them to all as a great improvement, and the best Bolster in use.  
Yours, &c.  
IRA COWEE, Supt. in Scituate Mfg. Mills.

Providence, Nov. 30, 1864.  
E. N. Steere, Esq.: Dear Sir—Your improved Self-Lubricating Spindle Bolsters are being used in my several mills, and give excellent satisfaction. The saving in oil is full fifty per cent. from the old plan of oiling up the machines, and fully meets my approbation.  
Very truly, JAMES Y. SMITH.

Newport, Aug. 27, 1863.  
E. N. Steere, Esq.: Dear Sir—We find your Patent Bolsters a great improvement; we find the spindles run a great deal steadier and stiller with your Bolsters, oiled twice a week, than they do in the common ones oiled twice a day, and they save at least seventy-five per cent. in oil, and keep the frames and floor neat and clean, and fully meet our expectations in every respect.  
A. S. TILLEY, for Perry Steam Mill.

This Bolster is patented in England, France and Belgium, and the patents for those three countries are for sale.

For Full Particulars and Circulars, Address,

ERASTUS N. STEERE, No. 10 Market Square, Providence, R. I.

Providence, Dec. 20, 1864.  
E. N. Steere, Esq.: Dear Sir—We have been using your Patent Bolsters for the past three years, and find, by using one-third of the oil on them that we do on the common Bolster, that they do not wear near so fast, then, as the common Bolster.  
Yours truly, H. KILBURN, Supt. Prov. Steam Mill.

Office of Continental Mills, Lewiston, March 22, 1867.  
E. N. Steere: Dear Sir—We have been using your Patent Bolsters for the last four years, and find them a great improvement in the saving of oil and labor. We oil them only twice a week.  
Yours truly, S. J. ABBOTT, Agent.

Cranston, R. I., April 15, 1867.  
E. N. Steere: Dear Sir—I have been using your Patent Bolsters for the last four years, and consider them a great saving in oil and labor, and in other respects all that they are represented to be.  
Yours respectfully, J. B. WOOD.

Cincinnati, Ohio, April 6, 1867.  
Mr. E. N. Steere—We have been using your Patent Bolsters on self-actors and ring frames, and find them all that is claimed for them—a great saving in oil and time, &c., and would not be without them.  
Yours truly, GOULD, PEARCE & CO.

Office of the Everett Mills, Lawrence, Mass., March 21, 1867.  
E. N. Steere: Dear Sir—This is to certify that we have been using your Patent Bolsters since 1862, and find them to be all they are recommended to be in every respect.  
Yours truly, J. M. PERRY, Ag't.

Taunton, March 29, 1867.  
E. N. Steere: Dear Sir—I have been using your Patent Bolsters for the last four years, and am very much pleased with them; so much so, that I have ordered some more from the F. F. & Machine Co. this week.  
Yours most respectfully, CHARLES ALBRO.

Woonsocket, R. I., April 22, 1867.  
E. N. Steere, Esq.: Dear Sir—Your Patent Bolsters we find to be all that you have recommended them to be. They give the most perfect satisfaction, and I would most cheerfully recommend them to the manufacturing community as being just what they need.  
Yours truly, S. A. ALDRICH & CO.

# A NEW STOVE

ON A NEW AND MODEL PLAN.

## CHILSON'S CONE-DISK STOVE.

This is a plan for a Stove that has long been wanted for *greatly economizing in the consumption of fuel* in warming offices, stores, workshops, railroad cars, factories, &c. It has been got up after a long and careful study, expressly for economy in fuel and for warming the air in the lower part of the room, as well as the floor, for a great distance around the Stove, instead of its ascending to the upper part of the room, as is the case with the common Stoves, and for keeping a continuous fire day and night. When once seen in operation, it will convince every one of its great superiority. It is very simple to manage, and is made in the most substantial and durable manner, wholly of cast iron, of a new and beautiful design. Sizes suitable for rooms from 15 feet to 100 feet square.

## ALSO A NEW OVALED PARLOR STOVE,

Just finished, April, 1867, of a new and beautiful design. Also several sizes of

Arranged so as to be attached to the Smoke Pipes of Furnaces, Ranges, Stoves, &c., as well as Steam Boilers, Brick Chimneys, &c., for the purpose of regulating their Fire Draughts, and also for Ventilation. Its operation will surprise all who witness it in the great length of time fire may be kept without replenishing with fuel, and in the wonderful economy in the consumption of fuel. *Proprietors and Managers.*

These works were originally projected and established by the present Senior proprietor in 1847, '48 and '49, and have, almost without interruption, since then been conducted by him—and for seven years, (1855 to '62,) under the firm name of EMERY BROTHERS, with his two Junior Brothers, William B. and George W., (the latter recently deceased).

In 1864, the present firm became the sole proprietors and managers of these extensive works and business, together with the large and complete assortment of patterns and working machinery, the accumulations of nearly twenty years, and have continued the same, in all its branches, for their own account and interest.

They have also made and added several new and valuable improvements and articles to the previous extensive assortment of labor-saving machines for the farm, plantation and work-shop, and have largely increased their facilities for manufacturing with greater rapidity and saving in cost, thus enabling them to afford better terms to purchasers than heretofore.

The Senior member of the firm was the pioneer of this business in this City, and has been the designer and patentee of all the leading and successful machines which have given these

and their Manufactures, their well-earned and deserved world-wide reputation and demand.

As other parties in this city have recently commenced the manufacture of agricultural machines, and are using similar names, illustrations, descriptions, representations, and in other ways are endeavoring to lead the public to suppose that these proprietors have died, and that these ALBANY AGRICULTURAL WORKS have ceased to exist, or have been re-organized under a new name and management, the attention of the public is respectfully called to facts herein stated, and a continuance of that patronage heretofore so long and liberally enjoyed by these Works, is solicited by the Proprietors.
